

# Anniversary Week of Action

February 11-19, 2012

## One year longer...

### Why an anniversary week of action?

To remember and honor the unprecedented protests of February and March of 2011, when the people of Wisconsin rediscovered the power of collective action.

To reconvene the empowered community that launched the Capitol Occupation and organized state-wide protests, and to reinvigorate the spirit of cooperation and solidarity that fueled them.

To identify ways we can expose the political and economic interests that exploit our democratic process out of greed, and set a course to defeat them.

To create a space where our movement can articulate a long term vision for structural change centered around social, economic, racial, and environmental justice for all people.

To sustain Wisconsin's 150+ year tradition as a laboratory of democracy by developing new forms of direct democratic decision making.
