

**Petition Calling on Employers to Speak Out Against the
Unwarranted Police Killings of Black and Workers of Color**

We, the undersigned workers at the _____ are outraged at the police killings of unarmed Black and workers of color who make up part of our collective workforce that are responsible for providing the public and human services, and making, warehousing and transporting the products that consumers buy that generate corporate profits from our labor.

The climate at our workplace is negatively affected by the understandable tensions and fears among Black and workers of color about our/their safety and lives as we/they travel to and from work at all hours, and live in communities that have been criminalized by the mainstream media.

We feel strongly, that you as our employer must speak out against these unending police killings, against the militarization of the police, and against the failure of the local, state and federal government bodies to take effective actions to end this racist, repressive and divisive climate intensified by these police killings.
